Providing quality bucket elevators and conveyors is what we at Frazier & Son have been perfecting throughout four generations. Let us show you how *We Convey Quality*™.

**GENTLE ELEVATING & CONVEYING**
Carefully designed transitions, gentle discharge configurations & slower chain speeds allow us to convey product without sustaining damage or degradation.

**SANITARY DESIGN**
- All units feature a stainless steel constructed frame
- Ground and polished welds
- Wet-washdown options are available

Visit us at Pack Expo booth S6004!
SAFETY FEATURES

• Totally enclosed conveyor reduces the risk of injury to personnel and protects product from outside contaminants
• Safety devices such as E-Stop Buttons, interlocking switches, two hand jog stations are available

RELIABLE

• With the use of CAD and state of the art fabrication equipment, our machinery is built with the precision and accuracy to provide reliable performance
• Positive tracking cams maintain control of the bucket throughout the circuit with no adjustment required

VERSATILE

• Variety of configurations available - single and multiple discharge units, indexing units, etc
• Six standard Bucket sizes to handle volumes up to 2500 cubic feet per hour
• Different bucket material options available, including polycarbonate, polypropylene, metal impregnated polypropylene, and stainless steel

EXPERIENCED

With decades of experience handling a variety of different products, Frazier & Son has the expertise to handle the most challenging materials. Frazier & Son has been providing quality bucket elevators and conveyors for over 55 years.
